

Wireless Signal Repeater

The Wireless Signal Repeater is a device that amplifies a signal before transmitting it again. It special for increasing the wireless signal transmit range.

The Wireless Signal Repeater can repeat 36 different frequency wireless signals in the same time. It's very popular in the wireless range products and solutions.

Specification

Model	RPT-3000
Working Voltage	12VDC
Wireless Frequency	433.92 MHZ
Transmission Range	3000m
Response Time	Min.3S,Max.10S
Working Current (mA)	150~180mA
Static Current	12mA
Applications	Wireless Signal transmit device, Wireless sensors, etc.
